AMENDMENTS TO THE CLAIMS

The claims are not amended. A complete listing of the claims, including their current status, is set forth below.

1. **(Previously presented)** A retroviral vector comprising a polynucleotide encoding a green fluorescent protein (GFP) having the amino acid sequence of SEQ ID NO:2.

2. **(Previously presented)** A retroviral vector comprising a first encoding polynucleotide, an IRES site, and a polynucleotide encoding a green fluorescent protein (GFP) having the amino acid sequence of SEQ ID NO:2.

3. **(Previously presented)** A mammalian cell comprising a retroviral vector according to claim 1 or 2.

4-19. **(Cancelled)**

20. **(Previously presented)** The retroviral vector of claim 1 or 2, wherein said polynucleotide comprises a human codon-optimized nucleic acid encoding a Renilla GFP.

21. **(Previously presented)** A mammalian cell comprising:
a retroviral vector comprising a polynucleotide encoding a green fluorescent protein (GFP) having the amino acid sequence of SEQ ID NO:2;
wherein fluorescence of said GFP can be detected by fluorescence-activated cell sorting (FACS).

22. **(Previously presented)** A mammalian cell comprising:
a retroviral vector comprising a polynucleotide encoding a green fluorescent protein (GFP) having the amino acid sequence of SEQ ID NO:2;

Atty Dkt. No.: RIGL-011
USSN: 09/710,058

wherein said mammalian cell is in the presence of a test agent, and wherein an effect of said test agent is detectable by detecting fluorescence of said GFP.
